

About VXL Instruments

VXL is one of the world's premier providers of thin client devices and has been manufacturing terminals and thin client products for over three decades. VXL's innovative range of high-specification, well-built devices helps enterprises beat the cycle of desktop obsolescence, free up internal resources from non-productive functions, and save significant revenue previously spent in securing systems. VXL is a global company, with global headquarters in Bangalore, India, North and South American regional HQ in Texas, and European HQ in Manchester, UK.

VXL Products

VXL produces the widest range of thin client devices available today including; Itona desktop and wireless desktop devices, innovative Itona thin client laptop, and integrated desktop devices. Devices are provided with Linux, Windows® CE or Windows® XP operating systems. In addition, XLmanage management software provides administrators the ability to manage VXL devices. VXL's products are backed by years of research, stringent quality standards, and state-of-the-art infrastructure.

VXL & Citrix

VXL has a long history of partnering with Citrix to ensure VXL products provide our customers with the full benefits of the Citrix environment. VXL consulted with Citrix to define market needs and specifications for a new line of thin client desktops with a range of features that would further enhance the Citrix user experience.

The first models specifically designed for Citrix were launched at the Citrix iForum global customer event held in October 2006, and included the Itona TC45xx desktop and TC46xx Wireless machines.

Itona Model Specifications

Itona TC45xx Desktop

- 1Ghz Via C7 Processor
- 128Mb Flash & RAM – 256Mb for XP
- Linux, Windows CE or XP
- XLmanage remote management
- PS/2 Keyboard & Mouse

Itona TC46xx Wireless Desktop

- Internal Wireless LAN
- Smartcard Reader
- 1Ghz Via C7 Processor
- 128Mb Flash & RAM – 256Mb for XP
- Linux, Windows CE or XP
- XLmanage remote management

The Itona TC45 and TC46 models were specifically designed for Citrix and have been optimised for the Citrix environment, providing superior performance with Citrix Presentation Server™ and Citrix Access Essentials™. Key hardware benefits include:

- First products to use the new VIA C7 1Ghz CPU
- New CPU gives 40% improved performance
- ROHS compliant
- Innovative fanless design with internal PSU
- No moving parts – highly reliable
- Small, elegant footprint
- Smartcard reader enabled
- Wireless Option

These new models are built by VXL to our exacting standards and this, together with the innovative fanless design means that high standards of reliability are achieved.

Pre-Installed Citrix Clients and Software

In addition to optimizing the hardware configuration for Citrix environments, the Itona TC45xx and TC46xx models are available with Citrix® ICA® clients and selected Citrix software pre-installed on the devices. VXL will tailor pre-installed software to include any or all of the following:

- Citrix ICA Client
- Citrix® GoToMeeting™
- Citrix® GoToWebinar™
- Citrix Password Manager™ Agent
- Citrix® NetScaler®
- Citrix Access Essentials - Ready

Citrix GoToMeeting, Citrix GoToWebinar and Citrix Password Manager Agent clients can be pre-loaded, customers are only charged for applications when activated.

Citrix Customer Rebate

To further enhance VXL products, each device includes a \$20 rebate voucher which becomes valid when connected to a Citrix server. This is a permanent discount for Citrix users and demonstrates VXL's commitment to delivering quality and value to Citrix customers.

Additional Products – Overview

As well as the Desktop and Wireless desktop ranges which are designed for Citrix, VXL offer the widest range of thin client devices available. The TC43xx Desktop and TC44xx Wireless Desktop ranges are from the same family as the models designed for Citrix, but without the optimization for the Citrix environment. The TL37xx series is an innovative thin client laptop range designed to bring the data security benefits of thin client to the mobile user. Additionally our TC54xx – TC55xx Integrated Desktop range is an elegant, solution to space constraints whilst boasting a host of additional features such as dual monitor support and inbuilt wireless networking and touch screen control on the TC55xx.
